StudentName: _____ Grade: _____ Birthdate: _____
Parent Name: _____
Address: _____ School _____
Year: _____
Phone: _____
Email: _____

General Guidelines for Developing a Course of Study for Grades 9-12

The following general criteria should be met when choosing curriculum for high school credit (please remember to check your state's minimum day requirements when planning your school year):

Grades 9-12 should consist of a minimum of 720 hours (60 credits) of class time per academic year. A 50 minute class period is the equivalent of 1 hour. The following is a suggested daily schedule that will cover all recommended areas of study. Please consult the individual graduation requirements for the Standard, Magna Cum Laude and Summa Cum Laude diplomas when planning the Course of Study for your student.

50 minutes a day for each of the following subjects:

Theology
English Composition and Vocabulary
History
Literature

Math
Science
Foreign Language

TOTAL : 1020 hours or 840 plus 180 (5 hrs/wk) which should be reserved for activities such as those listed below.

The remaining 180 hours averages to approximately 5 hours per week. These hours may be given to additional time working with the above course materials or used for electives during the week, i.e. PE, music, art, computer science, logic, etc. Participation in music, art lessons or sports teams may be counted toward this time.
